

WORKING STUDENT

Medical Data Labeling 10-20h

- » Munich
- » Dynamic team
- » Independent work environment
- » Partially home-office possible
- » Innovative medical products and projects
- » Your chance to leave your footprint

The Role

For our Munich office we are looking for a working student for medical image processing and data labelling.

As part of our young and dynamic team, you will specialize on ultrasound images and work on data labelling and analysis. Within our research projects you will work closely with our clinical partners in Vascular Surgery, Internal Medicine and Neurology.

Responsibilities

- Collect and archive medical image datasets from research projects
- Processing and labelling of medical ultrasound data
- Direct collaboration with our international research & clinical partners
- Take early responsibility for your own projects

Skills & Qualifications

- High level of independence and self-organization
- Strong interest in medical imaging, especially ultrasound
- Medical background beneficial (study level)
