

INTERN OR JUNIOR SOFTWARE ENGINEER, DESKTOP APPLICATIONS

Munich, Bavaria
Mönchengladbach, Nordrhein-Westfalen

Are you studying for a bachelor or master's degree and looking for a Praktikum/internship in software development in Munich or Mönchengladbach? We are growing our software engineering teams in Germany where you will deploy your creativity and ingenuity to contribute directly to the success of Elgato. We offer a flexible position where you will work on varied and challenging tasks that feed your personal and technical development on a schedule that fits your studies.

WHAT YOU'LL BE WORKING ON:

You can work on Elgato's desktop software for macOS and Windows that supports our complete line of audio, video and control products.

We are constantly improving our cross-platform development and test environment, and you can help improve this with new ideas for system design, quality assurance, debugging and performance optimization.

We offer you the choice to specialize on one engineering discipline or remain broadly focused, however we encourage our engineers to try new things and experiment.

You will be working independently in an Agile environment solving complex problems. We expect that your experience, intuition and initiative will help the team deliver the best possible implementations.

WHAT WE'RE LOOKING FOR:

We like to see experience writing desktop applications in C++ on macOS or Windows, perhaps using Qt Widgets. We are looking for any experience with algorithms, concepts and techniques in the field of audio and video streaming systems, or systems design & testing with modern CI/CD techniques.

You may know some Python, JavaScript, Django, C#.NET, iOS or Android, Linux, Docker, Raspberry Pi or other similar systems, but we like people who bring new ideas to work.

We are looking for self-motivation and an ability for creative problem solving. We like our engineers to be able to plan and structure their own work inside autonomous teams and take full ownership of their tasks.

Fluency in both written and spoken English; German skills are an advantage.

WHAT WE OFFER YOU:

Flexible working hours and a friendly, positive working environment

A focus on personal development and training in any relevant discipline

Modern and comfortable offices in the center of Munich or Mönchengladbach

Quarterly profit share bonus

Discounts on Elgato, Corsair, Origin, and Scuf Gaming products

Great coffee, drinks, fruit, catered lunch on Fridays and discounted lunch vouchers

Elgato is the brand of choice for video production technology among content creators on all platforms. If you've watched live gaming or any streaming content on YouTube or Twitch, chances are we helped make it shine.

In 2018, Elgato was acquired by Corsair, a provider of high-performance PCs and peripherals. Over the last three decades Corsair has cemented its leadership position in its key markets and continues to grow rapidly. As a semi-autonomous division of Corsair, we have engineering offices in Germany and California, and distribute our products in over eighty countries around the globe.
