Intern – Risk Engineering Services (RES) Corporate Solutions Munich (m/f/x)

About Swiss Re

Swiss Re Corporate Solutions provides risk transfer solutions to large and mid-sized corporations around the world. Its innovative, highly customised products and standard insurance covers help to make businesses more resilient, while its industry-leading claims service provides additional peace of mind. Swiss Re Corporate Solutions serves clients from over 50 offices worldwide and is backed by the financial strength of the Swiss Re Group.

About the Role

We are looking for an intern (m/f/x) who will support our risk engineers in respect of client service and report distribution in our markets in Benelux, France, Germany, UK, Italy, Spain, Nordics, Switzerland and South Africa:

- Portfolio Engineering Coordination by providing monthly updates of RES EMEA portfolio ensuring data quality and alignment of the various data bases. Closely work with the RES EMEA Head to agree on status reports, data quality and activity monitoring. Develop into the key contact for Underwriters and Risk Engineers regarding functionality, status and capabilities of the RES EMEA tool database
- Loss prevention recommendation follow-up by acting as an "extended-arm" of the Client Engagement team for recommendations follow-up, setting clear priorities and dates, conduct telephone follow-ups with customers. Record the findings and present these to the Client Engagement Team
- You pro-actively partner with Risk Engineers by identifying areas of improvement to remove complexity, developing suggestions where to standardize and implement measurable efficiency gains
- Publishing Market reports out of our Risk Engineering database, incl. re-formatting, proof-reading and finalizing, transmitting market reports to brokers and customers

About the Team

From operational to natural hazards, we have the hands-on experience to understand and mitigate risks. We help bring focus to property loss prevention and risk management practice and support our clients' needs. In doing so, we employ leading risk engineering tools. We also closely collaborate with underwriters to improve the insurability of industrial property risks. As a member of our global Risk Engineering Services (RES) community, you will be fully embedded in the EMEA team.

About You

This position requires strong language and analytical as well as very good service skills. Candidates must speak fluent German and English, candidates who additionally speak fluent French strongly improve their chances. You are in the final stages of your bachelor studies or already started your master studies. You should be very familiar with MS Office applications and have an interest in dealing with internal IT applications. We are open to business and industrial students who bring a technical mindset to work in a risk engineering environment.

Duration of the internship: 6 months, starting soonest

Working time: 38 hours per week
